Creasing and Perforating made simple
The CreaseMaster Plus+ is quick and easy to use!

The CreaseMaster Plus is ideal for the mid to high volume users ensuring a professional finish for every job. This pneumatic model is available in two production speeds; 3600 sph or 4600 sph and both offer multiple creases per sheet, job memory as well as other options such as Strike perf and Impact perf . The system incorporates a user-friendly touch screen allowing for easy set up and operation.

Single sheets from 45 gsm to 385 gsm can be fed through the machine whilst pneumatic impact creasing helps overcome the problems of cracking on digital stocks.

Being fitted with a suction air feeder that feeds from the bottom ensures that the machine can be constantly replenished with stock, avoiding costly delays and wasted downtime.

Optional features include a friction feeder, rotary scoring, impact perforating and strike perforating.

Both the stepper controlled drive and the paper sensor ensure registration of the impact crease or perforation to within +/-0.25mm whilst the impression control allows for quick and easy adjustment. During programming, the paper can be stepped forwards or backwards allowing accurate positioning of the crease or perforation to be achieved.

The Technical Bits:

Paper Weight:	45-385 gsm
Maximum Size:	457 x 570mm
Minimum Size:	89 x 127mm
Electrics:	230 Vac, 5amp, 50 Hz
Speed:	3600 A4 sheets per hour
Creasing:	10 creasing positions per sheet
Crease Position:	Electronic front panel control
Perforating:	All sizes of tpi, including micro-perf.
