Launched on to the market in 1953, the Adana '8x5' is possibly the most popular letterpress platen in the world. Thousands were sold up until 1991, when production was ceased. But now you can invest in a professionally re-manufactured version of this popular and versatile little machine, carried out by the original makers. Not only that, the machine is the genuine article, it carries a guarantee and you have the assurance of continued back-up and availability of genuine spare parts.

In addition, we can supply you with a great range of new and used lead type, type cases, cabinets and all the letterpress sundries you will ever require! Also to compliment this, we offer mounting bases for plates and complete Photopolymer Plate making systems. Then depending upon what you want to produce, we can recommend a starter kit to suit your individual requirements. Plus help, advice and instruction from qualified and experienced personnel is always on hand!

Experience the tactile satisfaction of producing good letterpress printing!
