ADANA®

Precision Aluminium Mounting Base

This base has been around for a long time and although specifically designed to suit the Adana 8x5 press to give the maximum size image or plate area, it can be used in any other letterpress machine where the mounting of photopolymer plates is required. Our stock thickness base accepts the 1.52mm thick plate, allowing for our double sided mounting adhesive.

We also produce a Delrin nylon Mounting Base that can be made to any specific size to fit any chase and accept any plate thickness thus suiting your exact requirements. Delrin bases are lightweight, easy to use and to keep clean.
