## ***Creasing and Perforating made simple The CreaseMaster Platinum is an excellent investment!***

The CreaseMaster goes Platinum. The most recent addition to the CreaseMaster line is an 8000 sheet per hour creaser able to satisfy the most demanding jobs for creasing. Shops investing in high-end digital printers need to ensure that the image remains impressive for their own customers. Digital touch screen controls ensure that the CreaseMaster Platinum is user friendly and easy to operate. These features such as: self centering air feed, batch counting, the ability to shift crease position on the fly, programmable job memory using presets, last job recall and numerous other attributes ensure superior performance and phenomenal value.

Being fitted with a suction air feeder that feeds from the bottom ensures that the machine can be constantly replenished with stock, avoiding costly delays and wasted downtime.

Optional features include a friction feeder, rotary scoring, impact perforating and strike perforating.

Both the stepper controlled drive and the paper sensor ensure registration of the impact crease or perforation to within +/-0.25mm whilst the impression control allows for quick and easy adjustment. During programming, the paper can be stepped forwards or backwards allowing accurate positioning of the crease or perforation to be achieved.

### ***The Technical Bits:***

Paper Weight:	45-385 gsm
Maximum Size:	457 x 570mm
Minimum Size:	89 x 127mm
Electrics:	230 Vac, 5amp, 50 Hz
Speed:	8000 A4 sheets per hour
Creasing:	10 creasing positions per sheet
Crease Position:	Electronic touch screen control
Perforating:	All sizes of tpi, including micro-perf.
