Creasing and Perforating made simple The CreaseMaster Pro makes light work of both

The CreaseMaster Pro is a floor model, impact creasing machine for low to mid-volume users. It is available in either a hand fed or a friction fed model and both are easily upgradeable should volume warrant it. Invert and Regular scoring in the same pass enables you to quickly create Z folded products.

Single sheets from 45 gsm to 385 gsm can be fed through the machine whilst the impact creasing system ensures that cracking on digital stock is eliminated.

Optional features include a friction feeder, rotary scoring, impact perforating and strike perforating.

Both the stepper controlled drive and the paper sensor ensure registration of the crease or perforation to within +/-0.25mm whilst the impression control allows for quick and easy adjustment. During the programming mode, the paper can be easily stepped forwards or backwards allowing accurate positioning of the crease or perforation to be achieved.

The Technical Bits:

Paper Weight:	45-385 gsm
Maximum Size:	460 x 635mm
Minimum Size:	76 x 127mm
Electrics:	230 Vac, 5amp, 50 Hz
Speed:	2000 A4 sheets per hour
Creasing:	5 creasing positions per sheet
Crease Position:	Electronic front panel control
Perforating:	All sizes of tpi, including micro-perf.
