NSF High Speed Foil Blocking Machine

£27,750 + delivery + installation + training - 4 years old, hardly used

The NSF is a totally new foil press concept. Key design considerations focus on impression strength, registration accuracy, maximum production speed, minimal foil waste, durability, and ease of operation.

The 3,000-foot foil roll capacity, the electronic foil tension control, the ability to make "on the fly" minor registration and impression pressure adjustments have all been designed to minimize down time. These unique features, combined with the high capacity feeder, which can be pre-loaded, enable the operator to work almost continuously on long runs achieving true production speeds of up to 6,200 iph.

- ☑ 305 x 315mm Maximum Sheet Size
- ☑ 89 x 115mm Min Sheet Size
- ☑ 216 x 289mm Max Impression Area
- ☑ Up to 6,000 Impressions Per Hour
- ☑ 815mm Pre-Load / Quick Change Feeder
- ☑ Jam Detector with Interrupt
- ☑ Programmable Foil Draw
- ☑ Electronic Foil Tension Control
- ☑ 3,000' Foil Roll Capacity
- ☑ Quick Lock Die Chase
- ☑ Registration Table
- ☑ Digital Heat Control
- ☑ Counter with Interrupt System
- ☑ Air Blast Foil Separation
- ☑ Adjustable Impression Pressure
- ☑ Double Sheet Sensor
- ☑ Automatic Lubrication System

The NSF has been designed to fill the needs of greeting card manufacturers, stationers and commercial printers.

The NSF is very user friendly with familiar small offset type controls. Current owners have been surprised at the ease of use and the speed at which new operators can be producing high quality work without lengthy training.

The NSF can be fitted with extra foil roll holders and Hologram registration systems to run secure documents. For short run work a remote hot plate and extra die chase is recommended to speed make-ready times further.

Exceptional productivity, accuracy, and high quality output, at an affordable price, make the NSF one of the most profitable machines for foil stamped work.
